Geography

Geography is a spatial science that deals with many aspects of social science (e.g. history and culture), physical science (e.g. weather and climate), and technical science (e.g. GIS and remote sensing). The concepts of space/location, place, human environment interaction, movement/diffusion, and regions are all important aspects to the study of geography.

| Requirement | Course Options* | Credits |
|---|---|---------------|
| General Education Courses | | |
| <u>Course</u> | <u>Curriculum Area or Course Title</u> | <u>Credit</u> |
| COM 100 or 103 | Communication | 3 |
| ENGL 1010, 1020 | English Composition I, II | 6 |
| HIST | History (any 2 of 2010, 2020 or 2030) | 6 |
| | Humanities and/or Fine Arts (Must include at least 1 Lit) | 9 |
